

Public Consultation on Flexibility Needs Assessment Methodology

In accordance with <u>Article 19e of the (EU) 2019/943</u> which entered into force with the <u>(EU)</u> <u>2024/1724</u>, Electricity Market Design Reform (EMDR), DSO Entity and ENTSO-E have been entrusted to define the data type, the data format, and the methodology for the analysis of the flexibility needs (Flexibility Needs Assessment Methodology or FNA methodology) that each electricity distribution system operators (DSOs) transmission system operators (TSOs) will provide their national regulatory authority or designated authority or entity.

DSO Entity and ENTSO-E established a joint task force to carry out their legal mandate by the 17 of April 2025, while engaging with key stakeholders. This public consultation allows all interested parties to submit their opinions on the FNA methodology draft, further ensuring transparency.

Please note that only responses received via this tool within the public consultation period will be considered.

Disclaimer

The associated draft of FNA Methodology is a preliminary version for the purpose of public consultation, not for approval. This is an intermediate step as both Associations are committed to consult at an earlier stage. Therefore, the document will be subject to changes both on technical and legal content. The respondents are kindly invited to provide feedback on the technical content.

Please note that **ONLY** responses submitted via the consultation tool within the submission period will be considered.

The methodology draft can be accessed <u>here</u>. The explanatory note for the methodology draft can be accessed <u>here</u>.
